REVIEWERS FOR VOLUME 37, 1973

A successful professional journal is sustained by a mix of many ingredients; chief among these is a core of sympathetic yet rigorously critical reviewers. While they work largely without recognition, collectively the opinions of the reviewers are the most powerful voice in the selection process that determines what will or what will not be published in our *Journal*. Moreover, their specific comments often greatly improve the organization, logic, and quality of manuscripts which survive the screening process. The following list of wildlife managers, administrators, teachers, and scientists contributed to the review process which selected and shaped the material in Volume 37. *The Journal of Wildlife Management* is grateful to them for their advice and support. Some of the institutions or agencies represented by reviewers have been identified by the following abbreviations:

CWS—Canadian Wildlife Service
CWRU—Cooperative Wildlife Research Unit
NYS—New York State
USFS—U.S. Forest Service
USNPS—U.S. National Park Service
